

## Do you have 10th graders who are excellent in English and love Science?

This will be the third year of the **REED Avodat Gemer in Agriculture in English** program. We are accepting applications now. They need recommendations from an English teacher, a science teacher and to write a 250 word essay **BY THEMSELVES** stating why they want to join the program. There will also be a zoom interview, dates TBA.

This exciting program includes a day trip this July, other trips during the year, and meetings with students from MIT, Boston and more. The program accrues them with 5 points of Avodat Gemer in Agriculture and a science bonus in the University.

Send your students [this link](#) to apply. Applications will be accepted until May 21, 2021
