

The Jerusalem Declaration for Advancing Education Through the Use of Artificial Intelligence

Statement by Ministers of Education

We, Ministers of Education, Government Representatives and Global Policy makers from across the globe, convened in Jerusalem, Israel, for the International EducAltion Summit 2026 - unite in our shared commitment to promote Artificial Intelligence and Technological Innovation as instruments for developing key competencies and focus on high quality education. These shall constitute a vital force in shaping a future defined by educational excellence, digital transformation and societal well-being, ensuring the educational system becomes a strategic engine for economic growth, and for the development of social capital and global leadership.

Therefore, We aim to encourage international cooperation in creating the following:

- **Agile Innovation** - Support and share knowledge and best practices to encourage adoption of innovative AI technologies, relying on agile regulatory processes including implementation of **Regulatory Sandboxes** and experimental frameworks for responsible AI development.
- **Innovative Pedagogy** - Foster global synergy to harness emerging technologies that transform the education landscape, accelerating cross border adoption of robust, personalized and inclusive AI tools. By aligning international, age-appropriate design principles we will nurture student critical thinking and intellectual integrity, and provide educators with next-generation technology-enhanced learning processes that introduce

shared standards **accountability** and **explainability** for transformative pedagogical growth.

- **AI Literacy and Competencies** - Sharing resources and curricula for integrating mandatory, **age-appropriate AI and Data Literacy and Competencies** into national education systems, empowering students to safely and informedly engage and thrive in an increasingly digital world.
- **Education Standards** - Collaborate over the exchange of information for the development of **legal, technical and ethical standards** in application of AI in **educational settings**, allowing for the full realization of AI's potential to foster **personalized learning paths**, and support the socio-emotional flourishing of every student, thereby optimizing their overall well-being and future success.
- **Teacher Training and Literacy** - Focus on collaborative development and international exchange of **programs and methodologies** to expedite the creation of effective professional development programs, fostering the foundational knowledge and competencies that will equip educators to seamlessly integrate and teach with AI technologies.
- **Shared Knowledge and Expertise** - Facilitate the **international exchange of information**, best practices, regulatory frameworks, and local standards among **cross sector stakeholders**, including the public sector, academia and industry, to enhance capabilities for effective and relevant AI governance and usage in education settings.

By strategically embracing **AI innovation** as a pivotal catalyst for global development, we collectively support a path of sustained educational **progress, safeguarding and securing the wellbeing** of all learners and shaping a more adaptive, promising **future for students across the globe.**

The Jerusalem Declaration was agreed upon by us in Jerusalem on February 4, 2026.
