

## The Second Day

### International Animation Project Development Seminar

September 9th-12th, 2004, Tel-Aviv

#### Friday, September 10th

09:30-13:00 Third Session-

How to approach this project – Procedural issues

- Defining the relationship between the schools.
- Schedule build-up for the project.
- Defining the modes of selection concerning issues of the material, editing, "packing", etc.

In this session we will decide the extent of synchronization needed between the participating schools. One option is that each school will work independently and select a predetermined number of films that will represent it in the project. The other is a collaborative approach, taking advantage of the unique opportunity to establish a dialogue between students and teachers working on similar subjects in different parts of the world.

If the collaborative approach is preferred it will be necessary to establish; datum-points, follow-ups, schedules, work process synchronization, etc.
